SUMMARY

Self-taught iOS developer with a passion for learning, collaborating, and creating. Hoping to bring skills and knowledge from pharmacy background into an exciting, new career in iOS development.

PROJECTS

Checked   **May 2021**

A todo app that is focused on UI design and features cloud storage, local notifications, haptic feedback, and widgets. Built with SwiftUI and CloudKit.

Pyrls Vision   **Apr 2021**

A drug information and interaction checker that features text-recognition. Built with SwiftUI and ML Kit Vision and uses the National Institutes of Health's Drug Interaction API.

Drug Names · Available on the App Store   **Feb - Mar 2021**

A quiz and flashcard app for learning the brand and generic names of 300 popular prescription and over-the-counter drugs. Built with SwiftUI and Core Data.

Hello World   **Nov 2020 - Jan 2021**

A real-time chat app that features user authentication via email and password, storing and fetching profile pictures, and tracking of unread messages and timestamps. Built with SwiftUI and Firebase.

WORK EXPERIENCE
